

Jamie Burkart

ENGINEERING PROJECT MANAGER | DELIVERY, QUALITY ASSURANCE & TECHNICAL OPERATIONS

Brooklyn, NY • (816) 728-8685 • jamie.burkart@gmail.com
[Portfolio](#) • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Engineering project and technical operations manager with 14+ years keeping small-team web products organized, tested, documented, and moving from ambiguous needs through release and maintenance. Works hands-on across delivery planning, requirements, issue reproduction, quality assurance, bug triage, UAT, release verification, status reporting, and durable handoff. Technical fluency spans Python/Django, JavaScript/TypeScript, React/Next.js, Ember.js, SQL/PostgreSQL, Git/GitHub, Docker/Dokku, open data, APIs, and AI-assisted evaluation workflows. Known for adding proportionate structure without burying engineers, product partners, or internal users in ceremony.

CORE SKILLS

- **Engineering delivery:** Scope and sequence work, track milestones and dependencies, clarify ownership, surface blockers, maintain action and decision logs, report status, and keep the next useful step visible.
- **Quality and issue operations:** Reproduce defects, document expected and actual behavior, write acceptance criteria and test cases, triage and prioritize issues, coordinate fixes, support UAT/QA, and confirm releases against requirements.
- **Product and stakeholder translation:** Connect engineers, product decisions, operational users, customers, and nontechnical stakeholders through concise requirements, demonstrations, release notes, training, and follow-through.
- **AI and technical workflow:** Use AI-assisted research, coding, documentation, and evaluation with deterministic checks, human review, source boundaries, mutation tests, and explicit failure states.

PROFESSIONAL EXPERIENCE

THICK ARTS LLC — Founder, Technical Project Manager & Web Systems Lead

New York, NY / Remote | 2009–Present

- Lead web product, design, engineering, and maintenance engagements from problem definition through requirements, implementation, testing, public release, adoption support, monitoring, issue resolution, and handoff.
- Work directly in JavaScript/TypeScript, React/Next.js, Ember.js, Python/Django, SQL, Git/GitHub, Docker/Dokku, APIs, and analytics; investigate defects, inspect application behavior and logs, define regression expectations, and verify fixes.
- Build delivery systems that fit the team: scoped backlogs, decision logs, action trackers, release checklists, documentation, and retrospectives. Remove or decline process when its cost exceeds its value.
- Led e-commerce, analytics, content, marketing, and operational improvements for [Harry J. Epstein Company](#) that contributed to a period of 2x revenue growth while helping an 80+ year-old business modernize its public and operating systems.

WOWList.org — Co-Founder, Product & Community Systems

New York, NY / Remote | 2015–2020

- Co-founded, co-built, and operated with Richard Caceres a Python/Django, PostgreSQL/PostGIS, and Ember.js community-calendar platform, coordinating product definition, implementation, organizer support, public communication, releases, and low-cost production operations.
- Operated across 35 city ecosystems through natural-language event entry, followable keyword communities, weekly digests, profiles, embeds, and calendar connections, supporting local organizers who ran calendars, websites, and email lists for their own scenes.

CallNYC.org — Civic-Tech Builder & Product Translator

New York, NY | 2016

- Built and launched an independent resident-facing follow-on to the New York City Council's first CouncilStat hackathon, translating constituent-services open data into issue pathways, district context, and next-step guidance; covered by Politico New York in 2016.

NYC Artist Coalition / FairRentNYC — Co-Founder, Civic Systems & Coalition Operations Lead

New York, NY | 2017–Present

- Implement and maintain public campaign systems while coordinating requirements, content, policy questions, stakeholder feedback, issue follow-up, and time-sensitive public releases across technical and nontechnical collaborators.
- Built and stewarded 30+ pages of shared campaign memory connecting decisions, action items, risks, source maps, public-data framing, and city/state workstreams without publishing private coalition records.

KC Town Hall LLC — Co-Founder & Project Manager

Kansas City, MO | 2015–2024

- Coordinated plans, vendors, public documentation, municipal requirements, field dependencies, and compliance for adaptive reuse of an approximately 6,500 sq. ft. historic building; co-developed a successful \$490,539 public funding request and later transitioned the project to a mission-aligned organization.

EDUCATION & PROFESSIONAL DEVELOPMENT

University of California, Santa Cruz — B.A., Film & Digital Media, Honors

AI Evals for Engineers & PMs — Shreya Shankar & Hamel Husain / Maven, 2026; application-centric evals, error analysis, annotation, traces, LLM failure modes, retrieval quality, and human-in-the-loop evaluation.
