PROFILE

Technical project manager and product operations leader with 14+ years moving public-facing products, organizational systems, and resident services from ambiguity through project strategy, participatory discovery, implementation, launch readiness, adoption, measurement, and learning. Bridges product, engineering, operations, community stakeholders, and senior decision-makers; translates customer needs and engineering constraints into clear scope, accountable owners, and usable systems. Builds proportionate structure for small and cross-department teams, adding process when its value exceeds its cost. Brings hands-on web fluency, responsible public-technology practice, and durable follow-through across civic technology, community platforms, cultural advocacy, and small business.

CORE SKILLS

- **Project strategy & systems implementation:** Project charters, business analysis, current-state and future-state workflows, requirements, implementation plans, work plans, delivery planning, status reporting, action and decision logs, ownership, dependencies, stakeholder alignment, and risk and issue management.
- **Engineering delivery & quality:** Product and stakeholder translation, scope, issue reproduction, quality assurance, bug triage, test cases, regression expectations, QA/UAT, release notes, and durable handoff across JavaScript/TypeScript, React/Next.js, Ember.js, Python/Django, SQL, Git/GitHub, Docker/Dokku, APIs, analytics, and low-cost cloud infrastructure.
- **Product operations:** Prioritization and tradeoffs, MVP scoping, launch readiness, readiness criteria, go/no-go recommendations, downstream impact, operational requirements, support preparation, runbooks, accountable owners, customer impact, metrics, retrospectives, and post-launch learning.
- **Responsible delivery:** Accessibility-aware and inclusive operations; confidentiality, privacy, public-safety review, and source boundaries; AI-assisted workflows with human review and deterministic checks; clear documentation of unknowns, decisions, and protected information.

EXPERIENCE

THICK ARTS LLC — Founder, Product & Technical Project Manager / Web Systems Lead

New York, NY / Remote | 2009–Present

- Lead end-to-end web, organizational operating-system, and engineering implementations, turning ambiguous customer needs into charters, current/future-state requirements, sequenced releases, quality loops, launch plans, adoption materials, documentation, and maintainable handoffs without unnecessary ceremony.
- Led e-commerce, analytics, content, marketing, and operations for Harry J. Epstein Company, contributing to 2x revenue growth while helping an 80+ year-old industrial business modernize without losing its trusted voice.
- Build scalable operating systems, publishing tools, data workflows, and reusable patterns; clarify ownership, surface risk, support customer care, and preserve release and post-launch learning so teams can continue the work.

NYC Artist Coalition / FairRentNYC – Co-Founder, Civic Systems, Coalition Operations & Policy

Communications Lead

New York, NY | 2017–Present

- Turn stakeholder listening, public testimony, and coalition priorities into implementation plans, campaign websites, forums, policy communications, calls to action, and multi-organization follow-through.
- Built and stewarded 30+ pages of shared campaign memory for a 2026 Commercial Rent Stabilization collaboration, connecting minutes, decision records, accountable actions, legal and policy questions, media assets, public-data framing, and city/state strategy while protecting private and sensitive boundaries.
- Facilitate challenging meetings, coordinate community stakeholders, brief elected officials and staff, and represent collective work in public testimony, presentations, and press while preserving collective credit.

WOWList.org – Co-Founder, Product & Community Systems

New York, NY / Remote | 2015–2020

- Co-founded, co-built, and operated with Richard Caceres a natural-language community-calendar platform, combining participatory discovery, engineering delivery, organizer-facing onboarding and support, public communication, instrumentation, and low-cost production operations across distributed maintainers.
- Reached a July 2017 production snapshot of 1,846 users, 16,142 posts/events, and 35 city-region keys with at least 50 posts; distinguish activity counts from retention, individual needs, resident outcomes, or causal impact.

CallNYC.org – Civic-Tech Builder & Product Translator

New York, NY | 2016

- Built CallNYC.org as an independent follow-on to the New York City Council's first CouncilStat hackathon, translating constituent-services data into resident-facing issue pages and next-step guidance; covered in [Politico New York](#).
- Took the civic product from problem definition through information architecture, implementation, public launch, and learning. The archived site is unofficial and not a current City service.

KC Town Hall LLC – Co-Founder & Project Manager, Historic Restoration / Mixed-Use Development

Kansas City, MO | 2015–2024

- Co-led planning, public-benefit documentation, vendor coordination, and municipal compliance for adaptive reuse of an approximately 6,500 sq. ft. historic building into four commercial spaces and three homes.
- Helped deliver Tired of Tires, a recurring free resident service connecting household eligibility, form and phone intake, scheduled field collection, City recycling coordination, volunteer participation, and public result reporting; public records document Jamie's participation in pickup operations.
- Co-developed the successful CCED proposal and served as the City's named developer/presenter and documented point of contact for a \$490,539 public funding request; later transitioned the project to a mission-aligned organization.

ADDITIONAL LEADERSHIP

196 Artists Residency / Sunday Dinner – Founder & Systems Steward | Brooklyn, NY | 2012–Present

Created repeatable invitation, onboarding, facilitation, documentation, and continuity systems across 300+ gatherings and 20+ resident artists.

EDUCATION & PROFESSIONAL DEVELOPMENT

University of California, Santa Cruz – B.A., Film & Digital Media, Honors

AI Evals for Engineers & PMs – Shreya Shankar & Hamel Husain / Maven, 2026; application-centric evals, error analysis, annotation, traces, retrieval quality, and human-in-the-loop evaluation.

ADDITIONAL INFORMATION

Valid New York State driver's license. Authorized to work in the United States; no sponsorship required.
